TradeManager is a reliable application which enables you to directly communicate with business associates, buyers or sellers. The software is dedicated exclusively to members of the online trading community of Alibaba.com. The website is a business intermediary between buyers and sellers. Facilitate business communication TradeManager allows you as a merchant to communicate directly with your partners, frequent suppliers or customers. The software offers you the means to communicate directly, quickly and privately. If you wish to buy/sell or simply contact other business partners, you may to create an online account on Alibaba.com, then use the same credentials to log into TradeManager. You may add several members to your list, then sort them into interest groups. You may create as many groups as you wish. Adding a new member to your list requires that the software identifies them as a user in the Alibaba.com community and verifies them. A symbol next to their names indicates whether they are online, active, busy or away from the computer. Privacy, statuses and direct communication You may set your daily status with the help of the proper indicator, as well as with a custom message that is displayed next to your name/ID. Moreover, you may customize the automatic reply system and activate it with several statuses: for instance, send an automatic reply when you are away from the computer. TradeManager can save your conversation history and display the most recent messages that you exchanged with a certain contact right in the IM box. You may set several security options, such as do not receive messages from contacts you have never contacted before or block certain users. Quickly communicate with business partners TradeManager allows you to send and receive messages from a business partner in a secure environment, which facilitates direct communication. The software supports instant messaging, but also audio/video calls. Additionally, you may transfer files to and from your computer or save a history of login times. TradeManager is a reliable application which enables you to directly communicate with business associates, buyers or sellers.
